

Attention:

HAS YOUR WELL BEEN FLOODED?

If you have noticed a change in water quality, or the flood water has been surrounding or covering the casing and cover of your well, you should not use the water from the well until your well has been tested for bacteria contamination.

Ashland County Health Department is offering to test wells that have been affected by the recent flood for bacteria at no cost.

Call Ashland County Health Department at 715-682-7004 or toll free at 877-682-7004.

Until the well water test is known, drink bottled water or water from a known safe source. If necessary, you can make water safe to drink by boiling water for five minutes. You can also contact the Health Department for assistance with bottled water.
